Northeastern Illinois University
CS 300: Client Side Web Development
Professor Yehuda Gutstein
Final Project

Due Date: See Syllabus

Objectives

- Comprehensive review of the HTML, CSS and Javascript skills learned this semester.

Basic Requirements

- Properly use and indent all tags.
- Set up page with <html>, <head> and <body> tags.
- The page should contain your name in the <footer>.

Project Description

- Using the skills you have gained this semester, recreate 2 – 3 pages of a website of your choice.
- All HTML and CSS should be built from the ground up. You may (and should) use images that you find on the site for your project.
- In addition to HTML and CSS, you will be adding some basic Javascript functionality of your choosing to the site.

Submitting your project

- There are 3 stages of this project:
    1. Pick the site (and the 2 – 3 pages you will be building)
        - Submit the URL along with screenshots to D2L
    2. HTML and CSS
        1. Upload the entire working directory to the CS server using Filezilla.
            – Include **all** HTML, CSS, and image files.
            – Keep the **exact** folder structure as your local computer.
            – Do **not** move HTML, CSS, or images to other locations or they will not properly render.
        2. After successfully uploading the files, you must confirm that the assignment loads as expected on your personal website.

– Navigate to *cs.neiu.edu/**yourusername/path_to_assignment/filename.html***
– Confirm that the page loads in the browser and looks like you expect it to appear.
– Copy the URL from the address bar.

3. Paste the URL into the textbox for the assignment on D2L.

3. Javascript
1. Upload the entire working directory to the CS server using Filezilla.
– Include **all** HTML, CSS, and image files.
– Keep the **exact** folder structure as your local computer.
– Do **not** move HTML, CSS, or images to other locations or they will not properly render.
2. After successfully uploading the files, you must confirm that the assignment loads as expected on your personal website.
– Navigate to *cs.neiu.edu/**yourusername/path_to_assignment/filename.html***
– Confirm that the page loads in the browser and looks like you expect it to appear.
– Copy the URL from the address bar.
3. Paste the URL into the textbox for the assignment on D2L.

• Sections 2 & 3 are both due the final week of the semester.

Grading

• Total possible points: 100

A ■ All content is present.
■ No broken images.
■ The page looks nearly identical to the screenshot.
■ Fonts are similar, although not necessarily 100% the same fonts.
■ Proper use of floating, positioning, colors, transparency, etc.

B ■ All content is present.
■ 0 -1 broken images.
■ The page is fairly similar to the screenshot.
■ Incorrect fonts.
■ Mostly proper use of floating, positioning, colors, transparency, etc.
